Summary

Salesforce Developer with 3.8+ years of experience designing scalable CRM and telecom order management solutions using Apex, OmniStudio FlexCards(LWC) and Flow automation. Experienced in Service Cloud automation, Agentforce implementations, AI-driven customer service solutions, and API integrations for telecom and insurance enterprise clients.

Technical Skills

- **SFDC Configuration:** Flows, Validation Rules, Permission Sets, Sharing Rules, Approval Processes, Dynamic Forms
- **SFDC Development:** Apex, LWC, OmniStudio FlexCards, OmniScripts, DataRaptors, Triggers, Custom metadata.
- **SFDC Integration:** REST API, Named Credentials, External System Integration, OmniStudio Integration Procedures
- **SFDC Clouds:** Sales Cloud, Service Cloud, Experience Cloud (basic exposure), Email-to-Case, Web-to-Lead
- **Agentforce:** Prompt Engineering, AI Agent Design, Agentforce Actions, Einstein Vector Search, RAG

Work Experience

Client: Telstra

Developer

- Built reusable FlexCards to dynamically manage telecom order lifecycle stages including service qualification, technician assignment, installation scheduling to improve order visibility, reduce service delays and enhance order processing efficiency.
- Designed a bulkified Apex trigger framework to manage telecom order lifecycle events supporting high-volume transactions.
- Built Agentforce conversational topics reducing L1 service tickets by 25%.
- Implemented OmniStudio Integration Procedures and Flow-based eligibility validations to orchestrate order hold and resume processes during validation failures or resource unavailability, ensuring only qualified orders reached provisioning systems.

Client: Unum OS

Administrator

- Developed Apex batch processes for large-scale insurance policy data processing.
- Improved data integrity and historical availability by migrating 50,000+ legacy policy records using Data Loader with validation rules and duplicate prevention, ensuring clean and reliable data.
- Implemented Service Cloud automation for claims workflows improving turnaround time.
- Built multi-level approval flows ensuring compliance in claims processing.
- Enforced secure data access by configuring role hierarchies, permission sets, and sharing rules, ensuring compliance with region-based and role-based access controls

Projects

AI Customer Service Agent (Agentforce)

[GitHub Repository](#)

- Built an autonomous AI banking agent on Salesforce Agentforce with 5 topics — account balance, transactions, card blocking, insurance FAQs, and prompt defence — using Invocable Apex, dynamic SOQL, Einstein Vector Search, and OTP authentication, with all test passed rate across 10 scenarios.

Certifications

Administration: Salesforce Administrator, Salesforce App Builder
Consultant: Service Cloud Consultant, OmniStudio Consultant

Developer: Platform Dev 1, JavaScript Dev I
AI: Agentforce Specialist

Education

Bachelor of Engineering (B.E.)

Savitribai Phule Pune University
